

ABSTRACT OF THE DISCLOSURE

A footwear kit having a hand-held remote controller and footwear with a sole comprising remotely controlled front and rear rotating discs coupled along a lateral side of the sole. The front and rear rotating discs provide an appearance of rotating wheels when rotating. The footwear and discs provide an illusion of a vehicle or hot rod. The kit may further include a carry case with a rotatable disc remotely controlled simultaneously with the front and rear discs. In an alternative embodiment, the kit may include a pump to inflate an inflatable chamber in the sole.
